COMIX4AI FINAL TPM

On 15–16 December 2025, the Comix4AI consortium and project partners met in Paris, France for the Final Transnational Project Meeting (TPM) of the project. During the meeting, partners reviewed the project’s overall progress, reflected on key achievements, and finalized the main project results, including the educational modules and digital resources developed throughout the project.

The Final TPM also provided an important opportunity to exchange ideas, strengthen collaboration among partners, and discuss the sustainability and future use of the Comix4AI outcomes. Through constructive dialogue and shared reflection, the partnership highlighted how the project’s work will continue to support educators and learners across Europe beyond its lifetime.

A warm thank you to all partners for their commitment, collaboration, and dedication throughout the Comix4AI journey.

The Comix4AI project aims to create a new path for Artificial Intelligence in secondary schools.

INFO ABOUT THE EVENT

- ✓ 1 school counselor
- Presentation of

The Comix4AI dissemination events, held across France, Cyprus, Portugal, and Greece, showcased the main results of the project, including the AI & ML Comics Module, the AI & ML Comics Lesson Kit, and the Interactive Digital Comics. Project partners and invited experts presented how comics can be effectively used as a pedagogical tool to introduce Artificial Intelligence and Machine Learning concepts, engaging educators, students, professionals, and stakeholders from the fields of education, digital innovation, and AI. In Cyprus, the event also included a hands-on workshop on comic creation using Artificial Intelligence, allowing participants to actively apply the Comix4AI methodology through creative and collaborative learning activities.

THE TRANSFORMATIVE POWER OF AI AND DIGITAL COMICS IN CLASSROOMS

The completion of the Comix4AI workshops, dissemination events, and final transnational meeting across partner countries marks the successful conclusion of the project's implementation phase. Through collaborative activities and knowledge exchange, educators, students, and stakeholders explored innovative, creative approaches to introducing Artificial Intelligence and Machine Learning through comics. All Comix4AI project results are now available online, including the AI & ML Comics Module, the AI & ML Comics Lesson Kit, and the Interactive Digital Comics, offering educators sustainable, ready-to-use resources to support engaging and accessible AI education beyond the project's lifetime.
